

Facility

You must respect the same color as with the wiring of our PCB circled in red, but the buzzer is compatible with any meter management printed circuit.

Model without option, connect the buzzer with the corresponding colors and stick it using the double-sided tape on the above of the meter

Model with option (clock or rev counter), connect the buzzer with the corresponding colors and stick it using the double-sided tape on the underneath of the meter

The buzzer requires a voltage regulator in perfect condition to work. If you have our PCBT3MACHIN' meter management PCB, you don't need to do anything. If you have a flexible management ribbon cable like the ones in the pictures below, you need to replace it. It is included in the kit.

1. Locate it on the tablecloth.
2. Unscrew the
3. Take it out by pulling it upwards.
4. Place the new one, inscription on the surface facing you, and screw it back on.
